

Warning: There are wild creatures that could be dangerous (especially on the weekends).

A collegeman is a rare creature indeed. They are elusive and very hard to spot. They say that collegemen spend most of their time in their cave playing video games or sleeping. It is said that the best time to see a collegeman is when they are exercising or eating. On the other hand you have a collegewoman who is a very social being. She can mostly be found at a party or anywhere there is a gathering. The picture in the bottom left is very rare because most collegewomen travel in packs. We have been studying them for years and they are yet to be understood.

If you spot either of these two creatures out of their natural habitat please contact me asap at 610-55-5555
